

Marcus Olsen

Bachelor of Science in Computer Science

About me

Outgoing and energetic computer science student with a passion for software development and for creating innovative solutions, thriving in a social and dynamic workplace culture. I enjoy environments where collaboration and community are central, and where I can contribute both professional skills and a positive attitude. My active lifestyle with table tennis and CrossFit reflects my drive and dedication, which I also bring to my work. I value combining technical development with human relationships and always strive to deliver results that make a difference.
